

**ELECTRIC RATES**

Monthly bills include two basic components, Energy Charge (kWh) and Demand (kW) for large commercial customers. The charges for all electricity consumed shall be at the following rates:

- (A) **Residential Service Rate:** applies to electric service for single-family dwellings, where the major use of electricity is for domestic purposes such as lighting, household appliances, and the personal comfort and convenience of those residing therein.

Energy Charge:

 Thereafter all kWh: \$0.1151 per kWh

- (B) **General Service-Small (Non-Residential) Rate:** available for single and three-phase service for non-residential service. This rate applies to customers whose consumption is *less than* 40,000 kWh per month or a demand *less than* 100 kW.

If the demand is *over* 100 kW per month for three consecutive months within a twelve month period, or consumption is *equal to or greater* than 40,000 kWh, service will not be provided under this rate.

Demand charge is the sum to be paid by large electric consumers for their peak usage level for which GJU recovers the cost of providing facilities to accommodate the peak demand.
